Description

OPQE02-SW is a transceiver module designed for 2 km optical communication applications, and it is compliant with IEEE 802.3cu 100GE FR1 standard. This module can convert 4-channel 25.78125 Gbit/s electrical data to 1-channel 106.25 Gbit/s optical signals. Similarly, it can convert 1-channel 106.25 Gbit/s optical signals to 4-channel output electrical data on the receiver side. It has been designed to meet the harshest external operating conditions including temperature, humidity and EMI interference. The module offers very high functionality and feature integration, accessible via a two-wire serial interface.
